Mohammad Sofyan Abdullah

0336-5052500 | sofyanrajpoot567@gmail.com | Linkedin | Portfolio

Education

COMSATS University Islamabad Sep 2022 – Mar 2026
Bachelor of Science in Data Science, CGPA: 3.58/4.00 *Islamabad, Pakistan*

Research & Professional Experience

AI Software Engineer Feb 2025 – Present
ScaledAI *USA (Remote)*
- Built LinkedIn and email outreach automation apps, increasing lead generation by 40% through intelligent targeting
- Developed a centralized lead tracking dashboard, reducing manual data entry time by 60% and improving sales team response latency
- Engineered an automated outbound pipeline that programmatically generates custom client websites by extracting and repurposing content from legacy domains, reducing manual development time by 90%
- Developed 'Delegation Doer,' a centralized management platform to track operational activities, project lifecycles, and client portfolios, enhancing team productivity and resource visibility

Gen AI Research and Developer May 2025 – Sep 2025
Medical Imaging and Diagnostics Lab, National Center for Artificial Intelligence (NCAI) *Pakistan*
- Developed end-to-end GenAI pipelines for healthcare with multilingual STT/TTS and speech diarization systems
- Built custom AI agents with patient history tracking and integrated DICOM viewer with MedGemma for medical imaging

Backend Web Developer Intern June 2023 – Aug 2023
Intern Geek (Startup) *Remote*
- Architected RESTful APIs using Node.js and MongoDB, optimizing database queries for 40% faster response times

Selected Projects

LinkedIn Reach Dashboard | *Next.js, React, TypeScript, Supabase, PhantomBuster, Apify* 2026
- Built a full-stack linkedin outreach automation dashboard supporting isolated multi-account lead pipelines
- Integrated Apify web scraping and PhantomBuster agent routing for automated LinkedIn engagement, plus a Drippify sync engine that auto-advances pipeline status on accepted connections
- Designed a full lead lifecycle (discovered → invited → accepted → messaged → replied → booked) with a Kanban pipeline board, sync run history, and owner-scoped dedup to prevent duplicate key violations

AI-Powered Demo Website Generator | *FastAPI, React/Vite, Claude API, Netlify* 2026
- Built a full-stack AI tool that scrapes prospect websites and generates custom, auto-deployed demo sites via the Claude API, cutting demo creation time from hours to under 2 minutes
- Architected a FastAPI backend with parallel pipeline execution (scraping, AI generation, deployment) and four generation modes including AI-powered in-place chat editing

PeerLearn – AI-Driven Collaborative EdTech Platform | *RAG, GenAI, Full-Stack Development* 2026
- Architected an AI-powered educational ecosystem with RAG-based Q&A, automated study materials, intelligent tutors, multilingual support, and Admin/Teacher dashboards

MediSight Nexus – AI-Powered Healthcare Platform | *Deep Learning, DICOM, MedGemma, STT/TTS* 2025
- Built comprehensive healthcare platform with DICOM viewer, multi-disease diagnostic engine, and MedGemma clinical LLM; integrated STT/TTS and HIPAA-compliant appointment management infrastructure

Scholarship Finder | *GenAI, FastAPI, LangChain, Grok, Tavily, Firebase* 2025
- Engineered an intelligent scholarship discovery platform with web search, document QA, memory integration, automated SoP generation, and real-time email notifications

Publications

- M. Sofyan Abdullah, M. Osman Abdullah, I. Masood, S. J. Fiaz, *"Technology-Enhanced Learning: Bridging Educational Gaps or Widening the Digital Divide in the Age of AI,"* Review of Applied Management and Social Sciences (RAMSS), Vol. 9(1), pp. 353–364, Mar 2026. DOI: 10.47067/ramss.v9i1.641

Rewards & Honors

- Top 5 – GIKI Softec | 1st Runner Up – COMSATS Hacktober Fest | Top 4 – Vyrothon Nationwide Hackathon | Hacknation 5th Global Hackathon | Anti-Gravity Competition by Google

Technical Skills

Languages: Python, Java, C++, JavaScript, SQL
Machine Learning & AI: TensorFlow, PyTorch, Keras, Scikit-learn, Hugging Face Transformers
NLP & LLM Tools: LangChain, LlamaIndex, BERT, Transformers, RAG Architecture
Data Science & Analytics: Pandas, NumPy, Matplotlib, Seaborn, Excel, Power BI
Web Development: Next.js, React, Flask, FastAPI, Node.js, TypeScript, HTML, CSS
Cloud & Databases: AWS, Azure, Firebase, Supabase, MongoDB
Certifications: Stanford Machine Learning Specialization, AWS Cloud Essentials, GenAI For Everyone, Networking (CISCO)
